Title: DOPED THERMIONIC CATHODE AND METHOD OF MAKING THE DOPED
THERMIONIC CATHODE

February 23, 2007

**REQUEST FOR CONTINUING EXAMINATION PURSUANT TO 37 C.F.R. § 1.114
AND SUPPLEMENTAL RESPONSE TO FINAL OFFICE ACTION MAILED JANUARY
23, 2006**

Commissioner of Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Please also consider this paper a Request for Continued Examination and a Petition for a five-month extension of time. Entry and full consideration of the Response and Information Disclosure Statement filed July 24, 2006 are respectfully requested.

Claims 1-272 are pending in the application.

This Request for Continued Examination after final is necessitated by the PTO's failure to properly consider the extensive scientific evidence of record proving the existence of lower-energy hydrogen, i.e., "hydrinos," underlying his claimed invention. This failure continues even after the PTO agreed to a procedure by which it would allow claims supported by scientific data generated and furnished by independent third parties.

In addition to the comprehensive disclosure in Applicant's originally filed specification, Applicant has submitted new, non-cumulative scientific evidence further confirming the existence of lower energy states of hydrogen, which evidence includes,
